

Dear Members of the Dulles Greenway Scholarship Committee,

I just wanted to say thank you for selecting me to receive one of your scholarships. I was extremely surprised when I found out I'd been picked. Because you've given me this scholarship, paying for college will be that much easier and therefore getting my degree will be less of a burden on my parents. I will not let you down and I will make sure that my degree in Environmental Science is used for the good I have planned. When you want to see how your scholarships have benefited our community, look around you and you will hopefully see some conserved piece of land or some animal that was preserved and, possibly without knowing it, you will have looked at something you helped to save. Thank you so much. ☺.

Sincerely,

Melissa Modolo
